

Date of notice: 23 December 2021

Belconnen trunk sewer update – shutdown period

Icon Water is building new sewer infrastructure to service the communities of Belconnen, Gungahlin and Hall. The project will also help us maintain public health and protect the environment. The new sewer is being installed within public land, parallel to Ginninderra Drive between the intersections of Ginninderra Drive and Copland Drive in Melba, and Ginninderra Drive and Tillyard Drive, in Charnwood.

To date, we have completed:

- establishing temporary work compounds and access tracks
- laying approximately 760 meters of new sewer pipe between Kingsford Smith Drive and Companion Crescent
- relocating existing stormwater pipes
- digging the large entry and receive pits (6 metres deep!) for the microtunnelling machine and tunnelled over 30 meters
- installing the sewer at the crossing of Companion Crescent, Flynn
- installing seven manholes across the installed sewer trunk main
- preparation for installing a 170m long pipe bridge to cross Ginninderra Creek

A bird's eye view of the new sewer trunk main being installed adjacent to Ginninderra Drive

Holiday shutdown period

Our final day of work for the year will be 23 December 2021. We will recommence construction activities on Tuesday 4 January 2022. Our work hours will continue to be 7am to 5pm Monday to Friday and 8am to 1pm on Saturdays. In the new-year, the team will focus on:

- microtunneling under Kingsford Smith Drive and installing pipes and fittings
- completing stormwater diversions
- installing the new sewer pipe between Kingsford Smith Drive and Companion Crescent, Melba
- site preparations for the OCUs located within public lands in Latham, Florey, Evatt and North Latham.

We thank you for your patience and appreciate your support for all our works in 2021. We would like to wish everyone a happy holiday period and will continue to keep you updated as we progress in 2022.

Yours sincerely

Lisa Quinn
Manager Customer Advocacy and Experience
