

# Have you changed?

Do you need a new liquid trade waste approval?

# If you have changed your situation, business or ownership you will need to submit a new Liquid Trade Waste Approval.

You are required to submit a new approval form where there is a change of:

- approval holder (either owner or occupier)
- activity undertaken on the premises
- approval conditions.

Approval is required for:

- new or existing premises of a non-domestic nature
- non-domestic fitouts involving changes to plumbing or drainage
- home business fitouts which may pose a trade waste risk (eg. catering, photographic processing and motor repair businesses)
- changes to the circumstances of an existing approval as listed above.

Any change to your plumbing requires a certified plumbing and drainage plan. A liquid waste approval must be obtained from Icon Water before a private plumbing plan certifier can approve the plan.

## How do I get an application form?
