

ACT Urban Water Cycle Digital Education

Learn about the amazing journey of water in the ACT! Find out how Icon Water delivers some of Australia's best water to your tap and the treatment process for the sewage from your home and school.

Our urban water cycle model is available for in-class sessions bookings delivered via live digital webinars. These sessions are tailored to your audience (Year 2 -10) helping students find out where your drinking water comes from and how it is treated.

The model displays the ACT and Queanbeyan's water supply network and highlights the amazing journey of water through the ACT's urban water treatment network right to your taps.

Discover the journey of our water that we use every day once it is flushed or goes down the drain. Learn what we all need to do at home and Icon Water's treatment of your sewage to produce high quality water that can be returned to the Murrumbidgee River.

We invite '[Questions from Kids](#)' with these session - please email though your classes top 10 questions your group would like to know more about. Email your questions in before your digital session for our education team to answer during your live webinar.

Session Requirements

- Education sessions are tailored for audiences according to curriculum outcomes.
- Sessions will run for 40-50 minutes. Multiple class/ year level sessions are encouraged with bookings.
- On booking, a confirmation email with a WebEx digital (secured & non-recorded) session invitation will be emailed to contact teacher. Connect to this digital session through your browser.
- You will need set up your classroom to enable students to view the digital presentation with visual and audio capability. Facilitation may be needed to support questions from your class.

For more information and to book your free digital education session, contact.
